

Ascora API Documentation

(v1.6)

You will need to retrieve your Auth Key from the **Administration** menu within Ascora.

This needs to be included in the Header for any request sent.

For details on retrieving your API key in Ascora please refer to the API setup docs at:

<https://support.ascora.com.au/display/AS/Ascora+Enquiry+API>

Enquiries

[POST] /Enquiry

```
{
  "companyName": "Acme",
  "firstName": "Jack",
  "lastName": "Johnson",
  "email": "jack@test.com.au",
  "mobile": "0401 000 000",
  "phone": "",
  "addressLine1": "119 Stirling Highway",
  "addressLine2": "",
  "addressSuburb": "Nedlands",
  "addressState": "WA",
  "addressPostcode": "6009",
  "addressCountry": "",
  "enquiryDescription": "Work Description goes here",
  "leadSource": "Online",
  "customFields": [
    {
      "fieldName": "Connection Type",
      "fieldValue": "ADSL 2"
    },
    {
      "fieldName": "Approved NBN Area",
      "fieldValue": "false"
    }
  ]
}
```

Any number of Custom Fields these can be added to the CustomFields collection.

fieldname: Name of the Custom Field as entered in Ascora

fieldValue: Value to be recorded.

Sample Response for successfully creating an Enquiry.

Entity Id = the ID of the newly created Enquiry

```
{  
  "entityId": "3a6c7c2d-4c8a-4020-b326-becebc66597d",  
  "success": true  
}
```

Adding Custom Fields

Many entities within Ascora support Custom Fields, fields that you have extended Ascora with to store your own structured data.

Particular operations in the Ascora API will support setting new Custom Field values or updating existing values.

To set the Custom Field Values append a Custom Fields list to the entity request. This is an array of Field Name and Field Value pairs, for example:

```
"customFields": [  
  {  
    "fieldName": "Connection Type",  
    "fieldValue": "ADSL 2"  
  },  
  {  
    "fieldName": "Approved NBN Area",  
    "fieldValue": "false"  
  }  
]
```

Custom fields can be provided when creating or updating the following entities:

1. Enquiries
2. Customers
3. Quotes
4. Jobs

NOTE: The Custom Field Definitions must have already been created in Ascora under **Administration** → **Custom Fields**.

NOTE: Custom Fields shall also be retrieved on these Entities. If no Custom Fields exist on the specified entity, the Custom Fields object shall not be returned.

Customers & Contacts

Searching for Customers

[GET] /Customers/Customers

Possible Filters

CustomerType - Customer Type associated with the Customer

LeadSource - Lead Source Name

AssignedUser - Full name of the associated Assigned user

SiteBillingType - Site / Billing / All - Type of Customer to be retrieved

FilterText - Free text filter against the Customer details

[Customer Number, Email Address, Phone Number, Mobile Number, Billing Customer Name, Contact First Name, Contact Last Name]

PhoneNumber - Searches across both the Phone Number and Mobile Fields.

PageSize, Page - Result Page Size and the Page Number to be retrieved

```
{
  "success": true,
  "message": null,
  "results": [
    {
      "customerId": "05aa5163-34fd-4aa7-8725-131fc3ce0bee",
      "customerNumber": "",
      "customerName": " Red Rooster Cranbourne North ",
      "companyName": " Red Rooster Cranbourne North ",
      "contactFirstName": "",
      "contactLastName": "",
      "emailAddress": "",
      "phoneNumber": "",
      "mobileNumber": "",

    "faxNumber": "",
    "defaultContact": false,
    "contactRole": null
  },
  "success": true,
  "message": "Contact Created/Updated"
}
```

NOTE: The *contactRole* specified is the name of the Contact Role. One will be created if this cannot be found.

Create / Update Customer

[POST] /Customers/Customer

```
{
  "customerNumber": "",
  "companyName": "API Test Customer",
  "contactFirstName": "",
  "contactLastName": "",
  "emailAddress": "",
  "phoneNumber": "08 12345",
  "mobileNumber": "",
  "onHold": true,
  "billingCustomerOnHold": false,
  "streetLine1": "1189 Albany Highway",
  "streetLine2": "",
  "streetSuburb": "Cannington",
  "streetPostcode": "6150",
  "streetState": "WA",
  "streetCountry": "",
  "streetLongitude": null,
  "streetLatitude": null,
  "postalLine1": ",Home Maker Centre\nSouth Gippsland Hwy.",
  "postalLine2": "",
  "postalSuburb": "",
  "postalState": "",
  "postalPostcode": "",
  "postalCountry": "",
  "customerType": { "Name" : "Domestic" },
  "leadSource": { "Name" : "Word of Mouth" },
  "billingCustomer": null,
  "assignedUser": null,
  "customFields": [
    {
      "fieldName": "Customer text",
      "fieldValue": "free text value test update"
    },
    {
      "fieldName": "Test DDL",
      "fieldValue": "2"
    }
  ]
}
```

NOTE: If the Customer ID is specified, the API will retrieve an existing Customer record and update the details. If a matching Customer could not be found then the following response will be returned:

```
{
  "customer": null,
  "success": false,
  "message": "No Customer could be found matching ID 05aa5163-34fd-4aa7-8725-131fc3ce0bee"
}
```

NOTE: If a Customer ID is not specified then a new Customer will be created as assigned a unique ID.

Field	Description
customerType	Associated Customer Type – will be created if it does not exist Must be passed as an entity Link <code>"customerType" : { "Name" : "Domestic" }</code> Or <code>"customerType" : { "Id" : "05aa5163-34fd-4aa7-8725-131fc3ce0bee" }</code>
leadsource	Associated Lead Source – will be created if it does not exist Must be passed as an entity Link <code>"leadSource" : { "Name" : "Google" }</code>

Sample Response:

```
{
  "customer": {
    "customerId": "a1ca0d91-1266-41be-883b-7b0a9a56b4ab",
    "customerNumber": "",

      "id": "6568caa6-aedd-423e-83cd-6d9a8df5539e",
      "name": "Domestic"
    },
    "leadSource": {
      "id": "f55d7494-79d7-40a2-9a22-ec49c7b12a1e",
      "name": "Word of Mouth"
    },
    "customFields": [
      {
        "fieldName": "Customer Text",
        "fieldValue": "free text value test update"
      },
      {
        "fieldName": "Test DDL",
        "fieldValue": "2"
      }
    ]
  },
  "success": true
}
```

Inventory

[GET] Inventory/Supplies

Retrieves all matching basic price items – such as materials or services.

Possible Filters

FavouriteOnly - Restricts to only Favourite Items Yes/No if specified

CategoryOneId - ID of the Category 1

CategoryTwoId - ID of the Category 2

FilterText - Searches across the Part Number, Supplier Part No, Description, Annotation, Category One Name.

```
{
  "success": true,
  "message": null,
  "results": [
    {
      "supplyId": "269a229c-3ad7-4c6c-bb8c-8c17659301bc",
      "partNumber": null,

}
```

[GET] Inventory/Categories

Categories are used to segment Supplies and Kits in Ascora.

Retrieves all matching Category – A Category can be in Category 1 or 2 within Ascora. Additionally, it could represent a Sub-Category that lives under a particular Parent Category.

Possible Filters

ParentOnly – True to retrieve only the Top-Level Categories

CategoryNumber – Indicates if Category 1 or 2 should be retrieved, blank for all

FilterText – Searches across the Category Name

```
{
  "success": true,
  "message": null,
  "results": [
    {
      "categoryId": "d747a113-b513-4e0a-9aec-443ee57dedd0",
      "name": "01 Test",
      "categoryNumber": 1,
      "parentCategoryId": null
    },
  ],
  "totalPages": 1,
  "totalRecords": 419
}
```

For example:

The following query will only find Categories that contain the text WASTE in the name, are in Category Number 1 and at the Parent Level.

<https://api.ascora.com.au/Inventory/Categories?FilterText=WASTE&CategoryNumber=1&ParentlyOnly=true>

```
{
  "success": true,
  "message": null,
  "results": [
    {
      "categoryId": "13baf518-5462-4b65-89cc-9ecbe61c8393",
      "name": "GRATES AND PLUG & WASTES",
      "categoryNumber": 1,
      "parentCategoryId": null
    },
    {
      "categoryId": "422fc649-9a8b-4bd3-8364-37cd0350c6b9",
      "name": "PLASTIC PIPE & FITTINGS WASTE - FLANGES",
      "categoryNumber": 1,
      "parentCategoryId": null
    },
    {
      "categoryId": "33edbb34-b4c8-40ff-9ba9-9666a6e17f40",
      "name": "PLASTIC PIPE & FITTINGS WASTE - GEBERIT FITTINGS",
      "categoryNumber": 1,
      "parentCategoryId": null
    },
    {
      "categoryId": "007dcbc2-478c-4a98-aa19-b2b90ee218e3",
      "name": "PLASTIC PIPE & FITTINGS WASTE - GEBERIT PIPE",
      "categoryNumber": 1,
      "parentCategoryId": null
    },
    {
      "categoryId": "fd8ffdfd-6bb8-4848-ade8-caa64a227387",
      "name": "PLASTIC PIPE & FITTINGS WASTE - TRAPS",
      "categoryNumber": 1,
      "parentCategoryId": null
    }
  ],
  "totalPages": 1,
  "totalRecords": 5
}
```

Stages and Sections

[Get] /Quotes/StandardSections

[Get] /Quotes/StandardStages

Will retrieve the list of standard Sections or Stages that are available to select and add to a Quote/Job

<https://api.ascora.com.au/Quotes/StandardSections>

<https://api.ascora.com.au/Quotes/StandardStages>

Sample Response

```
[
  {
    "name": "Sewer Drains",
    "displayOrder": 1
  },
  {
    "name": "Storm Water Drains",
    "displayOrder": 2
  },
  {
    "name": "Trade Waste Drains",
    "displayOrder": 3
  }
]
```

Labour Roles

Labour Roles represent the types of Labour that can be added to a Quote or Job. This endpoint returns all current Labour Roles ordered by Name.

[Get] /Quotes/LabourRoles

<https://api.ascora.com.au/Quotes/LabourRoles>

Sample Response

```
[
  {
    "labourRoleId": "6108272e-6c63-4e0d-9c2a-ead79eed392",
    "name": "Standard",
    "hourlyRateExTax": 65.0000
  },
  {
    "labourRoleId": "ab6412fe-67c9-40c5-ad36-32558d7fcd75",
    "name": "Test",
    "hourlyRateExTax": 150.0000
  }
]
```

Quotes

Retrieving a Quote by Quote Number

[Get] /Quotes/Quote/QuoteNumber

Will retrieve the details of the matching Quote.

NOTE: If searching for a section or stage element in the Quotation, the Quote Number should be specified with dashes instead of dots e.g. Q1234-01 instead of Q1234.01

<https://api.ascora.com.au/Quotes/Quote/Q57>

Searching for Quotes

[GET] /Quotes/Quotes

Possible Filters

FilterText - Performs a partial search against the full Quote Number, Name or Address.

QuoteStatus - Filters the Quotes to the specified Status. Will default to **OPEN** if not specified.

IN-PROGRESS

SENT-TO-CUSTOMER

OPEN - Quotes marked as either In-Progress or Sent to Customer

WON - Quotes that have been won and converted to Jobs

LAST-7-DAYS - Quotes created in the last 7 days

ALL - All Quotes regardless of Status

ACCEPTED - Quotes accepted but not yet converted to Jobs

JobType - Matches against the related Job Type.

AssignedUser - Find all Quotes based on the full name of the Assigned User

CustomerName - Find all Quotes with a partially matching Site or Billing Customer Name.

StartDate - Performs a search for all Quotes created on or after the specified date.

EndDate - Performs a search for all Quotes created on or before the specified date.

PageSize, Page - Result Page Size and the Page Number to be retrieved. Will default to Page 1, PageSize 250 if not specified.

Quote Field Definitions

Field	Description
PricingMethod	Pricing Method associated with the Quotation. Possible values include: TIME-AND-MATERIALS FIXED-PRICE SECTIONS STAGES If a Pricing Method is not specified, a default of Time and Materials (also known as Do and Charge will be used)
QuoteStatus	Integer value of the current Quotation Status 0 In Progress 1 Lost 2 Converted to Job 3 Sent to Client
JobType	The ID or name of the associated Job Type. For example, this can be specified as: <pre>"jobType": { "id": "c1f2f9a9-811d-4316-ad8f-8370ee33d663", }</pre> or <pre>"jobType": { "name": "Commercial Maintenance" },</pre> Leave blank to use the default Job Type.
Site Customer (required)	The ID or Customer Name of the Site Customer associated with the Quotation. The Customer Name is the Company Name of the Customer or the combined First and Last Name if an individual. For example, this can be specified as: <pre>"siteCustomer": { "id": "822fcf23-95b0-4155-a80d-fbb8914656a2" }</pre> or <pre>"siteCustomer": {</pre>

	<pre>"name": "1 Charlotte Street"</pre> <pre>}</pre> If no matching Customer by ID or Name can be found an error message shall be returned.
Billing Customer	The ID or Customer Name of the Billing Customer associated with the Quotation. The Customer Name is the Company Name of the Customer or the combined First and Last Name if an individual. For example, this can be specified as: <pre>"billingCustomer": { "id": "fc219d64-762e-4282-ab90-b3b7ac87afb0" }</pre> or <pre>"billingCustomer": { "name": "Hearth House Bunbury" }</pre> If no matching Customer by ID or Name can be found an error message shall be returned. If a Billing Customer is not provided the appropriate Billing Customer for the Site shall be used.

NOTE:

1. If no Job Type is specified the default Job Type shall be used.
2. If Total Inc Tax is specified, the Amount ex Tax will be automatically calculated.
3. If a Billing Customer is not specified, the appropriate Billing Customer linked to the Site Customer shall be used.
4. If no Address details are specified, the **Site Address** of the Site Customer shall be used.

The following is an example of the **minimum data** needed to create a Quote:

```
{
  "siteCustomer": {
    "id": "822fcf23-95b0-4155-a80d-fbb8914656a2"
  }
}
```

Adding Supplies, Kits or Write Ins to a Quote

It's possible to add onto a Quote, or Section/Stage of a Quote, any number of Supplies (a raw material or service), Kits (a collection of different supplies and Labour as a package or assembly) or Write Ins (items that don't exist in your price lists but are just written into a particular Quote).

Important Note: Each of the Add methods will take in a Quote Number. This is the full Quote Number which can include the Section and/or Stage numbering. For example, if adding materials to Section 1 in a quote the full Quote Number would be Q1234.01

Creating a Quote and Adding Items Simultaneously

It is possible to create a Quotation and also add the necessary Kits, Supplies or Write Ins.

This is done by adding the same collections of Kits, Supplies and Write Ins directly to the Quote Create body message.

Sample Creation Request

```
{
  "siteCustomer": {
    "id": "822fcf23-95b0-4155-a80d-fbb8914656a2"

Removing all Items on a Quotation

At times it may be easier to remove all of the current Supplies, Kits and/or Labour Items on a Quotation. This endpoint gives you the option of removing one element or all from the specified Quotation.

[POST] Quotes/ClearQuoteItems

Sample Request

```
{
  "quoteNumber": "Q79",
  "removeSupplies": true,
  "removeKits": false,
  "removeLabour": false
}
```

Sample Response

```
{
  "success": true
}
```

NOTE: This only applies to the specified Quotation in the case of a Section-Based Quote. To clear the items in a particular Child please use the full Quote Number e.g., Q1234.01 to remove the items in the first section.

Adding a Section to a Quotation

Section Quotes are used to break a Quote down into a number of sub-components or Sections. Each of the “Child” sections will then have its own Labour, Supplies, Kits etc. rather than at the Parent-level. The Parent will then be the sum of all child sections.

[POST] /Quotes/AddQuoteSections

Sample Request

```
{
  "quoteNumber" : "Q80",
  "quoteSections" :
  [
    { "name" : "Pre-lay", "displayOrder" : 1 },
    { "name" : "Slab & Drains", "displayOrder" : 2 }
  ]
}
```

Sample Response

```
{
  "success": true
}
```

Creating a Full Quote with Sections and Items in a Single Request

It is possible to submit a request and create the Parent Quotation, Child Sections and add all Items to those Child Sections in a single request using the standard Create Quote endpoint.

NOTES:

1. The Pricing Method must be set to SECTIONS to create a Section-based Quote or any Child Quotes shall be ignored by the API.
2. In a SECTIONS-based Quote all Kits, Supplies & Labour are specified at the Child level. Any items specified at the Parent-Level shall be ignored.
3. The standard QuoteKits, QuoteSupplies, QuoteLabourItem data can be added to the Child Quotes.
4. Child Quotes will be added in the order in which they are provided. In the below example Prelay will be created as section 1 and Slab & Drains as section 2.
5. If you want to add items to new sections of an existing Quote, you will need to create the Sections first then add the necessary items.

Sample Request

```
{
  "siteCustomer": {
    "id": "822fcf23-95b0-4155-a80d-fbb8914656a2"
  },
  "pricingMethod" : "SECTIONS",
  "childQuotes" :
  [
    {
      "quoteName" : "Prelay",
      "quoteKits": [
        { "Id": "d187f9c9-3bb0-4989-8a7f-ecec252b7240", "QuantityAdded": 1 },
        { "Id": "d187f9c9-3bb0-4989-8a7f-ecec252b7240", "QuantityAdded": 2 }
      ]
    },
    {
      "quoteName" : "Slab & Drains",
      "quoteSupplies": [
        { "Id": "269a229c-3ad7-4c6c-bb8c-8c17659301bc", "QuantityAdded": 1 },
        { "Id": "3f318415-41fc-4f01-8e0c-c8f8b00a0217", "QuantityAdded": 2 }

Updating the Status of a Quotation

Quotation Status can be updated through the range of available Quote Status. For example, marking a Quote as Sent To Client, Lost, In-Progress or Won.

NOTE: If a Quote is marked as Won, the related Job will be created and the Job ID returned in the success message.

[POST] /Quotes/UpdateStatus

Sample Request

```
{  
  "quoteNumber" : "Q80",  
  "quoteStatus" : "SENT-TO-CUSTOMER"  
}
```

Parameter	Description
QuoteNumber	Number of the related Quotation
QuoteStatus	New Quotation Status: 0. IN-PROGRESS 1. SENT-TO-CUSTOMER 2. LOST 3. WON
ReasonForLoss	Applied to the Quote as the Reason for Loss if the Status is updated to LOST.

Sample Response

```
{  
  "success": true,  
  "message": "Quote marked as Sent to Client"  
}
```

Deleting a Quotation or Quotation Section

This method allows a Quotation or a specified Quotation Section to be deleted. Deleting a Section will cause the parent Quotation totals to be recalculated and also adjust the section numbering. For example if you delete Section 2 in a Quote with 3 Sections, Section 2 will be renumbered to 2.

NOTE: Only Quotes that have a status of “In Progress” can be deleted.

[POST] /Quotes/DeleteQuote

Sample Request

```
{
  "quoteNumber" : "Q93.02",
}
```

Parameter	Description
QuoteNumber	Number of the related Quotation or Quotation Section

Sample Response

```
{
  "success": true,
  "message": "Quotation Section Deleted"
}
```

Response if Quotation has been Sent to Client

```
{
  "success": false,
  "message": "Quotation (Q93.01) is not In Progress and so cannot be deleted",
  "code": "INVALID-STATUS"
}
```

Attachments

This endpoint allows Attachments to be added across the core areas in Ascora.

Requests should be encoded as a multipart/form-data post.

[POST] /Attachments/{EntityType}/{EntityId}

This will attempt to attach the specified File to an **EntityType** matching the specified **EntityId**.

Parameter	Description
EntityType	Type of Entity to which the Attachment is being added. Supported values are: • Enquiry • Job • Quotation • Task • SupplierInvoice • Invoice • Supply • Customer
EntityId	The unique identifier associated with the entity to which the file will be added. Note: This must already exist in Ascora.

For example:

```
/Attachments/Enquiry/3a6c7c2d-4c8a-4020-b326-becebc66597d/
```

Sample Response

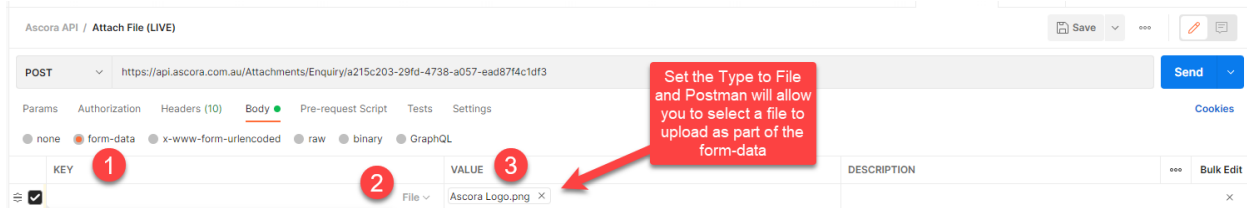

```
{  
  "entityId": "e14199f1-af03-4525-b189-e090bb07e524",  
  "success": true  
}
```

Where: entityId is the ID of the newly created Attachment (only populated if the upload is successful).

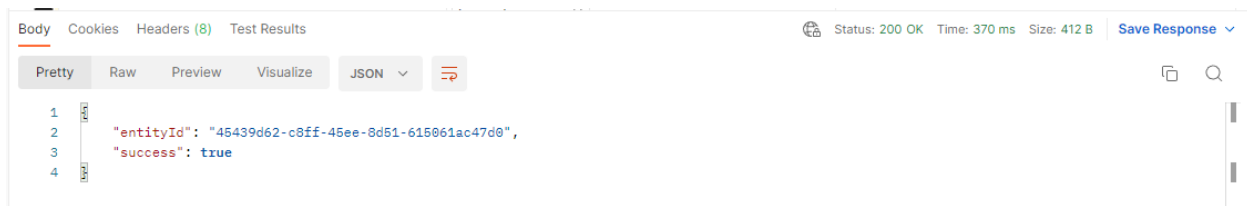

Testing Attachments

It's possible to test adding Attachments to Entities in Ascora via Postman.

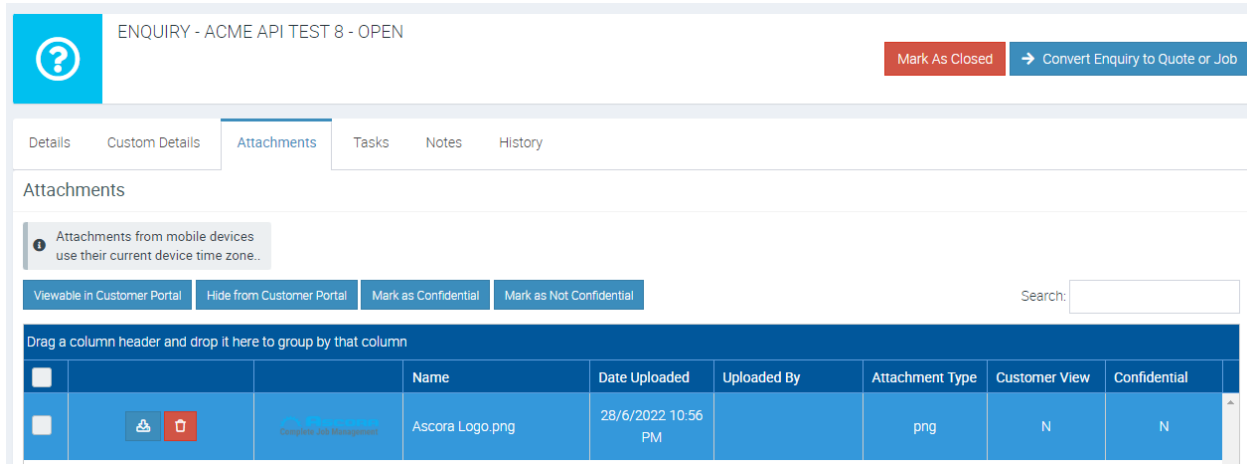

Here's an example:

Sample response:

From within the Enquiry the image is displayed as expected:

Notes

This endpoint allows Notes to be added across the core areas in Ascora.

[POST] /Notes/Note

Sample Request

```
{
  "entityId": "a9b42bed-45fb-4041-a699-62f364dfb9b0",
  "entityType": "Job",
  "noteContent": "API Test Note",
  "createdByName": "External System"
}
```

This will attempt to attach the specified File to an **EntityType** matching the specified **EntityId**.

Parameter	Description
EntityType	Type of Entity to which the Attachment is being added. Supported values are: • Enquiry • Job • Quotation • Invoice • Customer
EntityId	The unique identifier associated with the entity to which the file will be added. Note: This must already exist in Ascora.

Sample Response

```
{
  "entityId": "74822adb-b3f7-429e-9d61-e6093e6c5f3a",
  "success": true
}
```

Where: entityId is the ID of the newly created Note (only populated if the creation is successful).

Jobs

Retrieving a Job based on Job Number

[Get] /Jobs/Job/JobNumber

Will retrieve the details of the matching Job based on the full Job Number.

      "name": "ACME Real Estate"
    }
  },
  "success": true
}
```

The following is an example of the **minimum data** needed to create a Job:

```
{
  "siteCustomer": {
    "id": "7e690ecc-a8c5-4478-9963-17ec7d7ec592"
  }
}
```

Job Field Definitions

Field	Description
PricingMethod	Pricing Method associated with the Job. Possible values include: TIME-AND-MATERIALS FIXED-PRICE SECTIONS STAGES If a Pricing Method is not specified, a default of Time and Materials (also known as Do and Charge will be used)
JobType	The ID or name of the associated Job Type. For example, this can be specified as: <pre>"jobType": { "id": "c1f2f9a9-811d-4316-ad8f-8370ee33d663", }</pre> or <pre>"jobType": { "name": "Commercial Maintenance" }</pre> Leave blank to use the default Job Type.
Site Customer (required)	The ID or Customer Name of the Site Customer associated with the Job. The Customer Name is the Company Name of the Customer or the combined First and Last Name if an individual. For example, this can be specified as: <pre>"siteCustomer": { "id": "822fcf23-95b0-4155-a80d-fbb8914656a2" }</pre> or <pre>"siteCustomer": { "name": "1 Charlotte Street" }</pre> If no matching Customer by ID or Name can be found an error message shall be returned.

Billing Customer	The ID or Customer Name of the Billing Customer associated with the Job. The Customer Name is the Company Name of the Customer or the combined First and Last Name if an individual. For example, this can be specified as: <pre>"billingCustomer": { "id": "fc219d64-762e-4282-ab90-b3b7ac87afb0" }</pre> or <pre>"billingCustomer": { "name": "Hearth House Bunbury" }</pre> If no matching Customer by ID or Name can be found an error message shall be returned. If a Billing Customer is not provided the appropriate Billing Customer for the Site shall be used.
JobStatus	Current Job Status value: <pre>New = 0 InProgress = 1 Completed = 2 Cancelled = 3 Deferred = 4 Booked = 5 Unscheduled = 6 ReadyToInvoice = 7 Closed = 8</pre>

Supplier Invoices

Creating a new Supplier Invoice

[POST] /SupplierInvoices/SupplierInvoice

Will create a new Supplier Invoice based on the provided details.

<https://api.ascora.com.au/SupplierInvoices/SupplierInvoice/>

```
{
  "trackingNumber": "TEST12345",
  "invoiceDate": "2022-04-01",
  "dueDate": "2022-05-01",
  "supplier": {
    "name": "Reece"
  },
  "Lines": [
    {
      "partNumber": "CLI123",
      "description": "Clipsal plate",
      "Quantity": 5,
      "TotalAmountExTax": 50
    }
  ]
}
```

Sample Response

```
{
  "supplierInvoice": {
    "supplierInvoiceId": "3491569d-5b43-4df0-9f75-249cbbdc8cb9",
    "createdOn": "2022-07-09T21:01:59.007",
    "invoiceDate": "2022-04-01T00:00:00",
    "dueDate": "2022-07-09T00:00:00",
    "trackingNumber": "TEST123456",
    "reference": "",
    "accountCode": "",
    "isExpense": false,
    "lines": [
      {
        "partNumber": "CLI123",
        "description": "Clipsal plate",
        "reference": "",
        "unitCostExTax": 10.000000,
        "quantity": 5.00,
        "accountCode": "",
        "totalAmountExTax": 50.000000,
        "totalAmountIncTax": 55.000000
      }
    ]
  },
  "success": true
}
```

Note: Attachments can be added to the Supplier Invoice once it has been created via the Attachment API using the Supplier Invoice ID from the Response.

Supplier Invoice Fields

Parameter	Description
TrackingNumber	Supplier Invoice Number or Credit Note Number
Reference	Purchase Order or Job Number associated with the Supplier Invoice / Credit Note
InvoiceDate	Date associated with the Supplier Invoice / Credit Note
DueDate	Date on which the Invoice is Due
IsExpense	Indicates if the Supplier Invoice should be treated as an Expense in Ascora. If not provided this default to No.
Type	Set to the following: INVOICE – Creates a Supplier Invoice CREDIT - Creates a Credit Note

Searching for Supplier Invoices

[GET] /SupplierInvoices/SupplierInvoices

Possible Filters

SupplierName – Performs a partial match against the Supplier Name.

TrackingNumber – Performs a partial match against the Supplier Invoice/Credit Note Number.

ToBeSentToAccounting – Limits the results returned to only Supplier Invoices that have not been pushed to the Accounting Package yet.

InvoiceDateStart – Performs a search for all invoices with an Invoice Date on or after the specified date.

InvoiceDateEnd – Performs a search for all invoices with an Invoice Date on or before the specified date.

PageSize, Page – Result Page Size and the Page Number to be retrieved. Will default to Page 1, PageSize 250 if not specified.

Sample response

```
{
```

Suppliers

Searching for a Supplier

[GET] /Suppliers/Suppliers

Possible Filters

SupplierName – Performs a partial match against the Supplier Name.

SupplierNumber – Performs a partial match against the Supplier Number.

BusinessNumber – Performs an exact match against the Business Number (e.g. ABN) of the Supplier, ignoring all white space.

PageSize, Page – Result Page Size and the Page Number to be retrieved. Will default to Page 1, PageSize 250 if not specified.

Sample Query

GET /Suppliers/Suppliers?SupplierName=TESTING

Results

```
{
  "success": true,
  "results": [
    {
      "supplierId": "16a6b8cb-af34-4c0b-a8b6-ca8fc41c69cf",

```

Creating a new Supplier or updating an existing Supplier

[POST] /Suppliers/Supplier

The following example will create a new Supplier as the Supplier ID has not been specified in the body.

Body

```
{
  "supplierNumber": "",
  "name": "New Supplier from API",
  "businessNumber": "",
  "notes": "test Supplier",
  "phone": "1111",
  "fax": "3333",
  "mobile": "2222",
  "emailAddress": "4444",
  "streetLine1": "16/41 Catalano Circuit",
  "streetLine2": "Forum Business Park",
  "streetSuburb": "Canning Vale",
  "streetState": "WA",
  "streetPostcode": "6155",
  "postalLine1": "16/41 Catalano Circuit",
  "postalLine2": "Forum Business Park",
  "postalSuburb": "Canning Vale",
  "postalState": "WA",
  "postalPostcode": "6155",
}
```

Sample response

```
{
  "supplier": {
    "supplierId": "3aeb3770-9baa-4081-9cec-181368c8b0ab",
    "supplierNumber": "",
    "name": "New Supplier from API",
    "businessNumber": "",
    "contactFirstName": "",
    "contactLastName": "",
    "notes": "test Supplier",
    "phone": "1111",
    "fax": "3333",
    "mobile": "2222",
    "emailAddress": "4444",
    "expenseAccount": "",
    "streetLine1": "16/41 Catalano Circuit",
    "streetLine2": "Forum Business Park",
    "streetSuburb": "Canning Vale",
    "streetState": "WA",
    "streetPostcode": "6155",
    "postalLine1": "16/41 Catalano Circuit",
    "postalLine2": "Forum Business Park",
    "postalSuburb": "Canning Vale",
    "postalState": "WA",
    "postalPostcode": "6155",
    "invoiceDueDaysType": 0
  },
  "success": true
}
```

The following request will update an existing supplier as the ID has been specified:

```
{
  "supplierId": "3aeb3770-9baa-4081-9cec-181368c8b0ab",
  "supplierNumber": "",
  "name": "New Supplier from API",
  "businessNumber": "11 22 33 44 55",
  "notes": "test Supplier",
  "phone": "1111",
  "fax": "3333",
  "mobile": "2222",
  "emailAddress": "4444",
  "streetLine1": "16/41 Catalano Circuit",
  "streetLine2": "Forum Business Park",
  "streetSuburb": "Canning Vale",
  "streetState": "WA",
  "streetPostcode": "6155",
  "postalLine1": "16/41 Catalano Circuit",
  "postalLine2": "Forum Business Park",
  "postalSuburb": "Canning Vale",
  "postalState": "WA",
  "postalPostcode": "6155"
}
```

Sample Response

```
{
  "supplier": {
    "supplierId": "3aeb3770-9baa-4081-9cec-181368c8b0ab",
    "supplierNumber": "",
    "name": "New Supplier from API",
    "businessNumber": "11 22 33 44 55",
    "contactFirstName": "",
    "contactLastName": "",
    "notes": "test Supplier",
    "phone": "1111",
    "fax": "3333",
    "mobile": "2222",
    "emailAddress": "4444",
    "expenseAccount": "",
    "streetLine1": "16/41 Catalano Circuit",
    "streetLine2": "Forum Business Park",
    "streetSuburb": "Canning Vale",
    "streetState": "WA",

    "postalLine1": "16/41 Catalano Circuit",
    "postalLine2": "Forum Business Park",
    "postalSuburb": "Canning Vale",
    "postalState": "WA",
    "postalPostcode": "6155",
    "invoiceDueDaysType": 0
  },
  "success": true
}
```

Web Hooks

Subscribing to Web Hooks in Ascora

Web Hooks are a way of subscribing to certain events within the Ascora platform. When you subscribe to an Event, Ascora will call the URL Endpoint you've specified.

[POST] /WebHooks

This creates a subscription to the specified Web Hook Event in Ascora.

Body

```
{  
  "hookUrl": "https://my.endpoint.com/event",  
  "systemName": "ACME",  
  "hookEvent": "jobCreated",  
}
```

Field	Description
hookUrl	Full URL endpoint you wish Ascora to call when the related Event has been triggered.
systemName	The name of the External System – that is subscribing to the event.
hookEvent	Name of the Web Hook event to which we are subscribing Possible values include: - EnquiryCreated - EnquiryModified - CustomerCreated - CustomerModified - ContactCreated - ContactModified - QuoteCreated - QuoteStatusChanged - QuoteModified - JobCreated - JobStatusChanged - JobModified - InvoiceCreated - InvoiceModified - BookingCreated - BookingModified

If an incorrect Event Type is passed back an error message shall be returned:

```
{
  "message": "Unknown Web Hook Event provided JobCreation"
}
```

POST:

```
{
  "hookUrl": "https://external.system.here",
  "systemName": "Zapier Test",
  "hookEvent": "JobCreated"
}
```

Success Response:

```
{
  "subscriptionId": "1d930e71-7faf-4680-adea-6d529f16c044"
}
```

Removing a Web Hook Subscription

When you no longer wish to be notified you can delete a Web Hook Subscription.

[DELETE] /WebHooks/Delete/<SubscriptionID>

This will delete the specified Subscription to the Web Hook Event in Ascora.

NOTE: The Subscription ID is returned when initially creating the Web Hook.

DELETE /WebHooks/1d930e71-7faf-4680-adea-6d529f16c044

```
{
  "success": true
}
```

Accounting Integration Functions

Note: These methods are only required if you do not have a modern accounting package that supports a direct API connection, such as Xero, MYOB or QuickBooks.

Get Invoices to Send

Retrieves a list of Customer Invoices prior to the specified date that need to be sent to your Accounting Package. This method should be used when the Invoices prior to the specified date have been checked and finalised.

GET

<https://api.ascora.com.au/Accounting/GetInvoicesToSend?priorToDate=2024-01-01>

Parameter	Description
priorToDate	Only invoices that are dated prior to this date will be included.
includeJobCustomFields	True/false – set to True to include Custom Fields for the related Job. <i>[Defaults to false if not specified]</i> Sample Response <pre>"jobCustomFields": [{ "fieldName": "Preferences", "fieldValue": "N/A" }, { "fieldName": "Have you printed the job card?", "fieldValue": "false" }]</pre>
includeInvoiceCustomFields	True/false – set to True to include Custom Fields for the related Invoice. <i>[Defaults to false if not specified]</i> <pre>"invoiceCustomFields": [{ "fieldName": "Comments" }]</pre>

includeCustomerCustomFields True/false – set to True to include Custom Fields for the related Billing Customer.
[Defaults to false if not specified]

```
"billingCustomFields": [  
  {  
    "fieldName": "Comments or Special Instructions"  
  },  
  {  
    "fieldName": "Client Engagement Form",  
    "fieldValue": "false"  
  }  
]
```

Notes:

1. All Custom Fields are not included by default.
2. fieldValue will not be included in the response if the value is empty/null.

Sample Response

```
